

wants all the blessings of Christianity without Christ. And like fruit cut from the stem it will rot.

What do you do when the foundations are destroyed? You build upon the foundation which will endure. And that is why for two thousand years the Church has pointed not to itself but to Jesus Christ!

And thus we close with the Psalmist question, "If the foundations are destroyed, what can the righteous do?" Go to the temple and pray to God as your refuge! Cease to do violence! Do righteous deeds! Put your faith in the only foundation for life, even Jesus Christ our Lord! Amen.●

#### BUSINESS COMMUNITY ASSISTANCE TO KOSOVAR REFUGEES

● Mr. McCONNELL. Mr. President, I rise today to commend members of the American and international business communities who are providing resources and technical expertise to help the United Nations and other international relief organizations alleviate the suffering of hundreds of thousands of Kosovar refugees.

Today, as we embark on the initial stages of a peace agreement, hundreds of thousands of Kosovar refugees remain scattered across the globe. Slobodan Milosevic and his troops have driven these victims out of their country, separated families, destroyed homes, and stripped the refugees of their personal identification papers. The United Nations High Commissioner for Refugees (UNHCR) reports that over 800,000 people have been forced to flee Kosovo since the Serb Army intensified ethnic purges two and a half months ago.

Refugee situations are always difficult. The Kosovar situation, however, has been exacerbated and complicated greatly by Milosevic's attempts at "identity erasure." Serbian soldiers have stripped the Kosovars of all identification documents and systematically destroyed civil records. Adding to the complexity of the situation, the refugees are spread over 30 different countries.

Companies such as Hewlett-Packard, Compaq, Microsoft, Securit World, Ericsson, and ScreenCheck are partnering with the Red Cross, UNHCR, the International Organisation for Migration and other international organizations on projects that will register the refugees, provide them with identification documents, and reunite them with their families. These companies are providing technical expertise, equipment, personnel and other resources that are allowing the refugees to be registered and located much more efficiently and effectively than ever before.

We are certainly witnessing a situation where the Internet and other recent technological innovations are providing solutions for real life problems. For example, Microsoft, Hewlett-Packard, Compaq and Securit have developed and provided systems that allow refugees to be registered, added to an international database, and to obtain

identification cards—all within minutes. Further, the Red Cross is working with Compaq and Ericsson to launch the Family News Network, which is the first Internet-based refugee tracing system.

These companies are to be commended for their contributions to help restore the Kosovar community. It is my hope that in the future more members of the business community will enter into such beneficial partnerships to help address problems facing our country and our world.●

#### TRIBUTE TO BEDFORD MEMORIAL SCHOOL

● Mr. SMITH of New Hampshire. Mr. President I rise today to honor the Bedford Memorial School for being selected as the 1999 Top Elementary School of the Year by the Excellence in Education Committee. The "Excellence in Education" award is an annual program designed to identify one elementary, middle, and secondary school that is representative of the many outstanding schools in New Hampshire.

The Bedford Memorial School was chosen for this honor because of the dedication and commitment to education by its teachers, parents, and students. Its exemplary partnership with home and community and outstanding mentoring program for all staff has created an environment conducive to the development of young minds.

I admire this school's commitment to excellence. Over the last five years they have taken on challenging initiatives, participated in goals setting, created a community school council, and forged school-business partnerships. Student focus is also one of Bedford Memorial's strengths. The many co-curricular programs, an excellent special education department, and a gifted program are able to serve the students' individual needs. The school's success is epitomized in the school's motto "The partnership of home, school, and community is essential to achieve our goal of academic excellence."

The teachers, parents, and students of this school hold a special place in my heart. Over the years, Mary Jo and I have visited the Bedford Memorial School many times, had the chance to meet both students and faculty, and have had the honor of teaching several classes there. This close involvement with the school has allowed me to witness, first-hand, the quality of education that is provided at this school.

The honor of being named Top Elementary School of the Year is a fitting end to an era for Bedford Memorial School. I am confident that as they take on additional grades and students, their school spirit will only continue to grow.

As a former teacher and school board member, I understand the tremendous impact teachers have on a child's life. The Bedford Memorial School is a testament to the tradition of molding stu-

dents into successful adults. I wish to offer my most sincere congratulations and best wishes to the Bedford Memorial School. The school's achievements are truly remarkable. I feel honored to have had such a close relationship with the Bedford Memorial School and represent them in the United States Senate.●

#### ORDER OF PROCEDURE

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRASSLEY. Mr. President, I ask to speak in morning business.

The PRESIDING OFFICER. Morning business is in order.

Mr. GRASSLEY. If there is a time limit, I would like to speak for about 12 minutes.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

#### RURAL METHAMPHETAMINE USE RESPONSE ACT OF 1999

Mr. GRASSLEY. Mr. President, I am introducing legislation on behalf of myself, Senators KYL, DEWINE, HAGEL, and KOHL, a bill referred to as the Rural Methamphetamine Use Response Act of 1999.

I do this in my capacity not only as a Senator from Iowa but as chairman of the International Narcotics Control Caucus of the Senate—a caucus that has had a tradition of working in a very bipartisan way on legislation and oversight hearings.

Methamphetamine is emerging as a new major drug problem across the entire country. It is one of the most dangerous drugs currently available. Its use destroys individuals and its production harms the environment. It is a problem that disproportionately affects rural America, even in our most urban States.

Methamphetamine is not a new drug in this country, but its growing use is very much a new problem. As the chart shows, meth has been around our country since the early 1980s, but its use then was largely confined to biker gangs and with a very limited market. Even then, much of the meth was produced in homemade labs in this country. Very little of it came out of Mexico and not so much in rural America.

The chart shows the city of Philadelphia with lots of examples of use of meth and meth laboratories. The numbers were few then and medical cases of meth-related problems were limited.

In San Francisco, for example, there were only 65 medical cases of meth-related problems, even in the year 1984. Let me assure Members that very low level activity situation for methamphetamine was not going to last very long because it began to change in the late 1980s and early 1990s.

During that period of time, Mexican criminal gangs began to become more

involved, taking over production and marketing from the biker gangs in America. In doing so, they began to rapidly expand the availability of drugs and at the same time lowering the costs. Use began to grow, as it will, when drugs became widely available at affordable prices. It will also grow if there is a perception of low risk with that drug.

Somehow—and wrongly so—meth got a reputation for being harmless. It is simple. Most new drugs start that way. They are pushed on particularly young people as safe and OK. Of course, it is a lie. But it is common enough. Thus, it should come as no surprise that as meth use increased and spread beyond the Western States, along with this, so did reports of meth-related medical problems.

In 1989, medical cases in San Francisco reached 1,125, or 17 times the 1984 level of 65 which I already mentioned. The number of lab seizures increased, as well.

Remember, on this chart, the previous chart, and the next chart I will show, the red lines show an expanding importation of methamphetamine into our country with some from outside of Mexico, but most of the lines coming from Mexico and spreading all across our country—it is now beginning to reach the West and the Midwest—not so much in the East where it was when it started with biker gangs, but all over the United States.

While most of the drug is produced in Mexico by Mexican criminal gangs, there is a growing domestic production, much of this in rural areas. It is devastating.

Looking again at the chart previously shown, from 1982 to 1985, we had very little meth coming from Mexico into the United States. Most of what we had was domestic production. The numbers here in green illustrate the dimension of medical-related meth problems that are reported in the media. It also relates, to some extent, to the lab busts in that particular case. But from 1982 to 1985, it was very much limited to biker gangs being involved in that, very little out of Mexico.

Then you go to the period of the late 1980s, early 1990s. You see more red lines, meaning quantity and diverse distribution coming out of Mexico, some from Korea, probably some from other countries we will not show on this particular map but still, relatively little. Then after 1994, you see a very dramatic acceptance of meth use, but also most of it coming from Mexico and most of it from that source just finding itself spread all across the United States, so very much a growing problem, very much a problem of Mexican sources and cartels being the source of our problem in this country.

In 1998 we had 321 methamphetamine labs found in my State of Iowa. This was more than double the year before. As of the first quarter this year, over 170 labs have been found in my State. If you multiply that by 4, you are going

to see Iowa doubling the trouble of meth again in local production. That is what we know about. It does not account for the flow of meth from Mexico.

I know many other States in the West and the Midwest can tell a very similar story. We know this is a problem that is moving eastward. We are becoming a producing country for this dangerous drug. You can get the formula for producing meth off the Internet, and many of the chemicals to produce it can be found in local hardware stores and pharmacies. One of the common chemicals used in production is increasingly being stolen from farms.

The problem of production and use is growing worse. As it does so, it leaves in its wake broken homes and ruined lives. It is known on the street as crank, ice, speed, or meth. However it is named, the drug hooks users from all socioeconomic backgrounds. What is worse, medical experts and law enforcement officials point to younger and younger users. This is one of the most dangerous drugs we have ever seen. It is highly addictive, and it is a brain toxin. It attacks important functions of the brain, and, over time, prolonged use poisons these functions, in some cases permanently. The word on the street is that meth is a safe drug, but in fact it is a very vicious drug.

The physiological side effects of meth include brain damage, heart attacks, and seizures. It can cause insomnia and lead to paranoia as well as violent, erratic behavior. It has made routine police encounters with motorists more dangerous, and it has made investigating lab sites a risky undertaking. This highly dangerous, addictive stimulant disrupts homes, schools, workplaces, hospital emergency rooms, and even our courts. Worse yet, the production creates toxic waste dumps that endanger the environment and public safety.

Much of this problem disproportionately affects rural communities. Even in our most urban States, the threat is just overwhelming to local resources that have to bear the brunt of fighting the methamphetamine problem, because few small communities such as we have in rural America can cope with the explosion of users, pushers, and labs.

So those of us introducing this legislation—as I said, Senators KYL, DEWINE, HAGEL, and KOHL, and I—are then introducing this Rural Methamphetamine Use Response Act of 1999 today because we cannot turn a blind eye to this threat anymore. Passage of this legislation will move us forward in our efforts to protect our children and our future from the ravages of meth.

There are several key areas where this legislation will improve our ability to respond to the threat.

First, we need to get a handle on what the problem is. This legislation requires that the Secretary of Health and Human Services report to Congress

on how drug use, and particularly methamphetamine use, is different in rural versus urban settings. Today we can break drug use down into patterns by sex, by age, region of the country, education, and the type of drug use. We have some idea when kids—and they are kids—first try drugs. I believe there is a more serious problem in rural America today than there has ever been. Meth production and use disproportionately affect rural areas, even in large urban States such as California.

Meth is often called the poor man's cocaine, because it is most widely used in blue-collar communities, rural areas, and small to mid-sized cities. Yet our resources and focus tend to go to large urban areas, because that is where we can more easily document the problem.

After getting a better handle on the problem with better statistics on a national basis from our Secretary of HHS, we, second, suggest the Attorney General, through this legislation, provide the Congress with an annual strategy on how to deal with the problem systematically and coherently. This will establish a benchmark to guide future research and action. As part of this problem, this strategy is meant as a mechanism for tracking both use and the proliferation of meth labs. We do establish, then, this mechanism to do it. This will require the administration to relate resources to action. We do not see that connection today in a coherent way.

In addition, the legislation will support the creation of rapid response teams at the Federal level to provide language and intelligence-collection expertise to communities that must deal with foreign-based meth gangs.

Next, the legislation will increase resources to provide training in meth lab cleanup as well as increased funding to the Drug Enforcement Agency so it can improve assistance for lab cleanup and disposal. That is not something a lot of States are waiting for the Federal Government to do, but it is being done on an ad hoc basis, State by State. In my particular case, the State of Iowa has set up two teams with the resources to help in this cleanup, because it is such a dangerous environment.

One of the problems with meth is we have this proliferation of home meth labs, large and small. They are toxic waste dumps filled with dangerous chemicals. Handling these labs requires special training and equipment. My legislation will create a number of regional training centers to help struggling communities deal with the explosion in meth production.

The legislation would enhance the ability to provide training to local police and sheriffs to meet this challenge.

Finally, this legislation will increase penalties for trafficking anhydrous ammonia, one of the major components in one method of producing meth, across State lines and would provide assistance for research methods for making

anhydrous ammonia useless in meth production.

The intent of this legislation is to address a problem that is growing and spreading across the country, one that disproportionately affects small and mid-sized cities and rural areas.

I urge my colleagues in this body to join in supporting the Methamphetamine Use Response Act of 1999 and respond now to this challenge before it grows worse and before it spreads any further if, in fact, it can spread much further.

I yield the floor.

#### SOCIAL SECURITY AND MEDICARE SAFE DEPOSIT BOX ACT OF 1999

Mr. LOTT. Mr. President, I ask unanimous consent that the Senate now turn to Calendar No. 152, H.R. 1259, regarding the Social Security lockbox issue.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (H.R. 1259) to amend the Congressional Budget Act of 1974 to protect Social Security surpluses through strengthened budgetary enforcement mechanisms.

There being no objection, the Senate proceeded to consider the bill.

#### CLOTURE MOTION

Mr. LOTT. Mr. President, I send a cloture motion to the desk to the pending bill.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The legislative clerk read as follows:

#### CLOTURE MOTION

We the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, do hereby move to bring to a close debate on H.R. 1259, the Social Security and Medicare Safe Deposit Box Act of 1999.

Trent Lott, Spencer Abraham, Rick Santorum, Gordon Smith of Oregon, Mike Crapo, John H. Chafee, Judd Gregg, Larry E. Craig, Rod Grams, Connie Mack, Frank Murkowski, John Warner, Slade Gorton, Fred Thompson, Michael B. Enzi, and Paul Coverdell.

Mr. LOTT. Mr. President, for the information of all Senators, if no previous cloture motions are invoked, this cloture vote will occur on Wednesday of this week, 1 hour after the Senate convenes, unless changed by consent.

All Senators will be notified as to the exact time of the cloture vote.

#### CALL OF THE ROLL

In the meantime, I ask unanimous consent that the mandatory quorum under rule XXII be waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LOTT. Mr. President, did the Senator have a reservation or a comment?

Mr. DASCHLE. Before we moved off this legislation, it was my intention to lay down an amendment. I don't need any time to talk about the amendment tonight but certainly prior to the time

we have the cloture vote. Obviously, our desire is to offer some amendments to the bill. Because the bill is now the subject of the consideration of the Senate, it would be my desire at this point to lay down an amendment.

Mr. LOTT. Mr. President, I understand the Senator's desire, and I want to talk with the Senator about how he wished to proceed on this issue this week. However, I do not yield for the purpose of laying down an amendment at this time.

#### MORNING BUSINESS

Mr. LOTT. Mr. President, I ask consent there be a period for the transition of routine morning business, with Senators permitted to speak for up to 10 minutes each.

Mr. DASCHLE. Reserving the right to object, let me say the whole idea, obviously, behind this amendment or any other amendments would be simply to address what I think we all recognize is an important issue—the Social Security lockbox. The only reason Democrats have been voting against cloture is simply because we have been “locked out” of our opportunity to offer amendments, such as an amendment which would provide for the Medicare lockbox as well as Social Security.

I am disappointed in our inability to lay an amendment down tonight. I think we can accommodate our colleagues on both sides of the aisle. We would agree to a limited number of amendments. I think we could dispose of this legislation with that kind of an agreement. I hope to talk with the majority leader at some point before the cloture vote to see if we can't find a way to have an agreement procedurally that would preclude the need for a cloture vote.

I will not object to this request.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LOTT. I thank Senator DASCHLE for his explanation and I appreciate his courtesy. I am very much committed to the concept of making it difficult for Social Security funds to be used for any purpose other than Social Security.

I want to get to a direct vote. I know there are other amendments Senator DASCHLE or others would like to offer, and I will discuss it with him and see if we can't find a way to do that before this week is out.

With that, I yield the floor.

#### UNANIMOUS-CONSENT AGREEMENT—S. 331

Mr. GRASSLEY. Mr. President, on behalf of the leader, I ask unanimous consent that on Tuesday, June 15, the Senate proceed to the consideration of Calendar No. 80, S. 331, at a time to be determined by the majority leader, after consultation with the Democratic leader. I further ask unanimous consent that immediately upon reporting

of the bill, a substitute amendment offered by Senator ROTH, which will be at the desk, be agreed to; that the bill then be read a third time, with no intervening action or debate; and that the Senate proceed to a vote on passage at a time to be determined by the majority leader and the Democratic leader. I finally ask unanimous consent that it not be in order for the Senate to consider any conference report or House amendments to S. 331, or its House companion, if it contains a net increase in direct spending in fiscal year 2000, the period fiscal year 2000 through 2004, or the period fiscal year 2005 through 2009, as estimated by the Congressional Budget Office.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### MARTIN LUTHER KING, JR. HOLIDAY

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 96, S. 322.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 322) to amend title 4, United States Code, to add the Martin Luther King, Jr. holiday to the list of days on which the flag should especially be displayed.

There being no objection, the Senate proceeded to consider the bill.

Mr. CAMPBELL. Mr. President, I take this opportunity to urge my colleagues to support passage of S. 322, the Dr. Martin Luther King, Jr. Day Recognition Act of 1999. It is a fitting and appropriate tribute to have this legislation honoring Dr. King pass the full Senate on Flag Day which is being commemorated today.

This legislation will amend the Flag Code to add the Martin Luther King, Jr. holiday to the list of days on which the American flag should be displayed nationwide.

It is a testament to the greatness of Martin Luther King, Jr., that nearly every major city in the U.S. has a street or school named after him. Dr. King, a minister, prolific writer and Nobel Prize winner originated the non-violence strategy within the activist civil rights movement. He was one of the most important black leaders of his era and in American history.

When Dr. King was tragically assassinated on April 4, 1968, he had already transformed himself as a national hero and a pioneer in trying to unite a divided nation. He strove to build communities of hope and opportunity for all and recognized that all Americans must be free to truly have a great country.

Dr. King was a person who wanted all people to get along regardless of their race, color or creed. His holiday came about due to the work of many determined people who wanted all of us to
